Jumping statement
- Break
- continue ; } do while
- switch

```
for(int i=1; i<=100; i++){
    if(i==50){
        Break;
    }
    Sout("baba sorry ☹")
}
```

Syntax of switch case

```
int n=2
switch(value){
    case 1:
        Break;
    case 2:
        Break;
    default
        Break
}
```

char n = 'A'
- char
- int
- short
- byte

;

n = 2 == 1
2 == 2

(1 → 7)
- 1 → monday
- 2 → Tuesday
- ⋮
- 7 → sunday

Invalid day

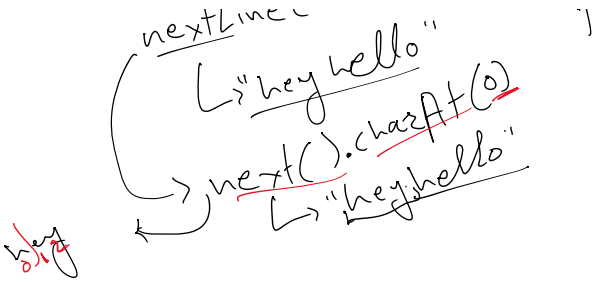

int a ;
int b;
char opt;

a = 10
b = 20

nextline()
"hey hello" nt(0)

+, -, %, *, /

At(0)

next().charAt(0)

opt = sc.next().charAt(0);

"H" → string

'H' → char
